Tatiana Semenova

Frontend Developer 📍Berlin

GitHub 🔗 LinkedIn 🔗

tatiana.semenova.de@gmail.com

WHOAMI

Frontend developer with a background in archival and records management, finishing 42 Berlin in 2026.
I turn Figma mockups into React and TypeScript apps that are **pretty and properly built**.

PROJECTS

Poolaki - expense tracking web app 🔗

UX/UI, Frontend, QA - React, TypeScript, MUI, Figma, Playwright, Vitest

Team graduation project at 42 Berlin

- Designed the app's pages and user flows, starting from Figma mockups.
- Built the frontend in React and TypeScript. Made the app work on mobile, with a separate navigation pattern for small screens.
- Created a custom design system: reusable components built with MUI primitives, such as forms, pop-up windows (modals), notifications and charts, plus a shared theme for colours and typography.
- Wrote end-to-end tests with Playwright for key user flows, run across Chromium, Firefox and WebKit, and unit tests with Vitest for core business logic.
- Used AI tools to speed up development, reviewing generated code and fixing its mistakes. Collaborated with the team through Git and pull requests.

Kotlin Website Migration (test assignment) 🔗

React Router 7, TypeScript, Vite,
JetBrains @rescui and @jetbrains/kotlin-web-site-ui libraries

- Rebuilt the Kotlin website homepage using new stack, moving away from outdated frameworks.
- Preserved original design and layout.
- Implemented SSR (server-side-rendering), what increased SEO-optimisation of the webpage.

The project was completed as a test assignment for an application to participate in an internship at JetBrains.

Tarot Reading App 🔗

React, TypeScript, Vite, GitHub Pages

A web app that does humorous tarot readings in three steps: pick a reading, shuffle, reveal.

- Created the animated starfield background using **Canvas API**.
- Used **View-Transition API** for smooth animated changes for card flip.
- Deployed on GitHub Pages.

TECHNICAL SKILLS

Web, UI & Testing:
React, HTML5, CSS3, Figma, Playwright, Vitest

Languages:
JavaScript (ES6+), TypeScript, C, C++

EDUCATION

42 Berlin | Software Engineering Program (2024 – Present)

- **Core Curriculum:** C/C++ projects on memory management, algorithms and Unix systems programming.
- **Python Discovery Piscine:** a 2-week sprint covering Python basics, data structures, and scripting.

Ural Federal University | M.A. in Archive and Documentation Management (2014 – 2016)

Ural Federal University | B.A. in Roman Linguistics (2009 – 2013)

EXPERIENCE (RELEVANT & OTHER)

Documentation Manager | Kontur (IT)
RU | 2018 – 2019

Managed full document lifecycles and data integrity within an eDMS.

Optimised workflow logic with engineering teams to accelerate document retrieval.

Project Coordinator | MOTIV (Telecom Sector)
RU | 2016 – 2018

Collaborated with legal teams to ensure compliance with property laws and regulations.

Coordinated landowners and technical teams to secure contract renewals and project delivery.

Manager / Archivist | Archive & Telecom Sectors
RU | 2013 – 2016

Structured and maintained large-scale documentation systems and corporate archives.

VOLUNTEERING & COMMUNITY

Stage Manager | droidcon Berlin & Fluttercon Europe | Sep 2025.
Coordinated stage operations and international speakers at two major Android and Flutter conferences.

Speaker Support | WeAreDevelopers World Congress | Jul 2025.
Provided technical and logistical support to keynote speakers at a global tech congress.

On-Site Volunteer | The Merge (GitButler) | Jun 2024.
Helped run a developer conference on the ground: attendee support, setup and logistics.
